PROFESSIONAL SUMMARY

Information Technology Engineer (graduated 2026, GPA 9.6/10) and Junior Full Stack Developer working with TypeScript, React/Next.js, and Node.js. I helped migrate a social network from Bubble to custom code with React, Node.js, MongoDB, and Socket.io, and I designed, built, and deployed a CRM with Next.js and PostgreSQL that now runs a real clinic. Advanced English (CAE certificate).

PROFESSIONAL EXPERIENCE

Full Stack Developer — Naked's

Feb 2025 – Dec 2025

Social network startup with e-commerce · 2-developer team

- Took part in migrating the platform from Bubble (no-code) to a custom-coded application, mainly owning the frontend.
- Built the main sections with React, Next.js, TypeScript, and Tailwind CSS: feed, profiles, communities, messaging, notifications, and settings, with responsive design.
- Integrated the frontend with the Node.js, Express, and MongoDB backend, including user authentication with Supabase and JWT, and real-time chat with Socket.io.
- Collaborated through Git/GitHub on technical documentation and problem-solving during development.

FEATURED PROJECT

CRM for a Podiatry Clinic — Client project (in use)

Jul 2026 – Present

Live demo: podocrm-sandy.vercel.app

Stack: Next.js, TypeScript, PostgreSQL, Prisma, Supabase Auth, Google Calendar API, Tailwind CSS, Vercel

- Digitized the full operation of a clinic with about 800 patients a month: patients, clinical records, appointments, payments, and inventory, replacing Excel sheets and paper records.
- Automated per-podiatrist commission calculation and the daily cash close, eliminating the owner's manual calculations and saving him about 6 hours a week.
- Designed the relational data model in PostgreSQL with Prisma and integrated the schedule with the Google Calendar API.
- Built one-click printable reports (including the official Ministry of Health report) and a clinical record with a unique ID and medical flags.
- Shipped a public demo with fictional data, guest login, and daily reset, with a database and deployment separate from production.

TECHNICAL SKILLS

Programming languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, responsive design

Backend: Node.js, Express, REST APIs, WebSockets (Socket.io), authentication with JWT

Databases: PostgreSQL, MongoDB, Prisma ORM

Testing: Jest, unit testing

DevOps & deployment: Git, GitHub, Docker, CI/CD (GitHub Actions), Vercel

Tools & methodologies: Postman, Figma, Scrum / Agile, technical documentation

Languages: Spanish (native), advanced English (CAE, Cambridge)

EDUCATION

B.Eng. in Information Technology and Digital Business

Aug 2021 – May 2026

Universidad Anáhuac Mayab · GPA 9.6 / 10 · SEP scholarship

CERTIFICATIONS

- Full Stack JavaScript — The Odin Project (2024)
- Developing Front-End Apps with React — IBM (2024)
- Certificate in Advanced English (CAE) — Cambridge (2017)
