PROFESSIONAL SUMMARY

Full Stack Developer specialized in JavaScript and TypeScript, with React/Next.js on the frontend and Node.js on the backend. I build complete web products —from the interface to the API, the database and deployment— with real production experience: I designed and built a CRM currently used by a client. Strong foundation in REST APIs, authentication, SQL and NoSQL databases, version control and CI/CD. Advanced English (CAE certified).

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, React Native, Redux / Zustand
Backend: Node.js, Express, REST APIs, GraphQL, WebSockets (Socket.io), authentication (JWT, OAuth, Firebase, Supabase Auth), Python
Databases: PostgreSQL, MongoDB, SQL, Prisma, Firebase (Firestore)
DevOps & Cloud: Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel; cloud fundamentals (IAM, compute, storage, logging & monitoring)
Tools: Postman, Jest / Testing, Figma, Linux, Bash
Languages: Spanish (native), English (advanced — CAE, Cambridge)

PROFESSIONAL EXPERIENCE

Full Stack Developer — Naked's 2024 – 2025

- Developed and integrated product features, connecting frontend and backend through REST APIs across complete flows.
- Implemented and maintained user authentication with Firebase, ensuring reliable access and sessions.
- Diagnosed and fixed production incidents (debugging), contributing to system stability and availability.
- Documented technical processes and architecture decisions, easing the onboarding of new developers.
- Coordinated delivery using Git/GitHub and issue-tracking tools within an agile team.

SELECTED PROJECTS

CRM for a Podiatry Clinic — Client project (in production) 2025

Live demo: podocrm-sandy.vercel.app · Role: full-stack development (product, design and code)

Stack: Next.js, TypeScript, PostgreSQL, Prisma, Supabase Auth, Google Calendar API, Tailwind CSS, Vercel

- Digitized the clinic's entire operation (patients, clinical records, appointments, payments and inventory), replacing Excel sheets and paper files.
- Integrated the schedule with the Google Calendar API and automated per-practitioner commission calculation and the daily cash close.
- Built an analytics dashboard that shows the business at a glance: revenue and attendance trends vs. the previous period, average ticket, revenue per practitioner and top-requested services, with custom accessible charts and a table view.
- Generated printable reports in one click (including the Ministry of Health report) and a clinical record with a unique ID and medical flags.
- Shipped a live demo anyone can try without signing up (guest login, fictional data and daily reset) with a step-by-step guided tour, from the same codebase with a separate database and deployment.

Real-Time Collaborative App — Personal project (in progress) 2025

Stack: React, Node.js, Express, MongoDB, Socket.io, JWT

- Live multi-user collaboration (chat and presence) with instant synchronization over WebSockets.
- Custom REST API with JWT authentication, automatic reconnection and data persistence in MongoDB.

Mobile App with Integrations — Personal project (in progress) 2024

Stack: React Native, Expo, TypeScript, React Query, REST / GraphQL

- Cross-platform app (iOS and Android) from a single codebase, integrating external REST and GraphQL APIs.
- Remote-data fetching, caching and synchronization with React Query, with well-handled loading, error and empty states.

EDUCATION

B.Eng. in Information Technologies and Digital Business Aug 2021 – May 2026

Universidad Anáhuac Mayab · GPA 9.6 / 10 (SEP scholarship)

CERTIFICATIONS

- Full Stack JavaScript — The Odin Project (2024)
- Developing Front-End Apps with React — IBM (2024)
- Certificate in Advanced English (CAE) — Cambridge (2017)
